DHForest is a forestry consultancy company that works with some of the most advanced equipment available. High quality work, sound professional background and more than 15 years experience, are characteristics that molded the trilingual team of **DHForest** into a trustworthy solution to any problem or challenge our client might encounter within his forestry project. Our work has been used in a variety of ways in the past; as a confirmation of our clients' work, a control local management, as an independent specialist for third parties, expert audits, feasibility determination, etc.

We would like to present to you the services we provide and have provided for many years.

We cover everything

To filter out any mal practice that could potentially harm the investment, we can visit plantations on a regular basis as an independent eye watching over the assets. Often small adjustments, once in a while, is all what it takes to maintain a plantations' management on course.

There is no activity within a plantation's management that is not covered by our expertise. Our clients often have used our advice and reports as a primary tool to test and adjust the policy of their management teams.

The Management plans we elaborate, spin the red line that is needed to obtain a "green seal" certification and enforce quality maintenance. With the training of our clients' staff as one of our services, we anticipate on the fact that without proper knowledge and techniques, the plantations' well being is compromised.

Avoid mal practice

DHForest S.A. Info Sheet

Care, knowledge and precision

Two of the most critical moments during a forestry project are the acquisition of land and Planting. Both activities must be done with care and knowledge, as they are the basis of future development. Soil properties, hydrology, quality of seedling genetics, handling of seedlings and nursery planning are just a few of the subjects that arise during these phases, in which **DHForest** is skilled.

For those who do not wish to have their own executing body, **DHForest** also offers to implement the maintenance. Our experience, equipment and dedication will insure a successful management of a project and will prevent the unwanted situations in which many companies found themselves in the past.

Plantation maintenance

Growth monitoring is essential

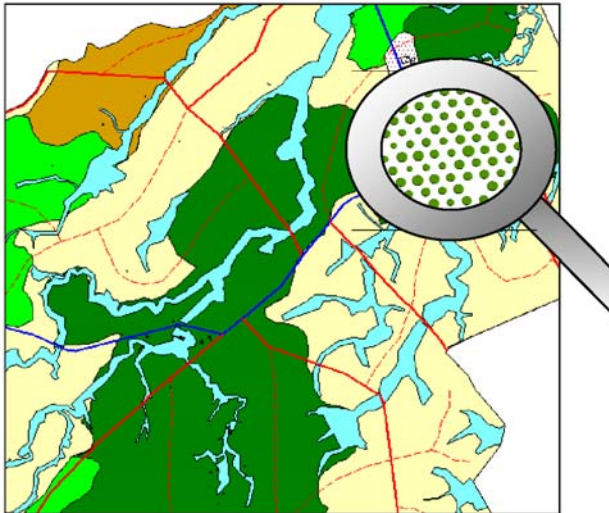

Yearly measurements are the basis of all forestry activities within a plantation, such as, feasibility adjustments; yield prognosis, optimum thinning calculations, etc. Therefore, it is extremely important to maintain a high quality, statistically sound, survey network, another one of our specialties. Furthermore, the survey data will provide precise equations, used to determine the current value, growth and commercial volume of our client's assets.

DHForest S.A. Info Sheet

The marketing of your plantation products is one of the primary concerns of our clients. We maintain a broad web of connections that covers all phases off timber use, ranging anywhere between kilns, mills and export, which will positively influence the offset on the global market. If additional income is desired, our knowledge of carbon fixation, subsidies, unconventional non-forest products, etc. will broaden the possibilities.

Marketing of plantation products

**Mapping your forest
even on the most detailed level.**

Digital technology has entered the forestry sector and **DHForest** did not stay behind. With the use of GPS hardware and GIS software, we have, more than once, pointed out costly errors in area calculations. The possibility of swift changes, superior presentation and, interactive plantation (maintenance) overviews are just some of the many advantages of digital mapping. With our latest mapping and inventory program MapAllTrees, we are even able to map you forest on the most detailed level, namely at individual tree level.

Our clients also enjoy the option of an interactive presentation of the plantations' activities on the Internet, through a secure server, anticipating on the global personalities of our clients.

We would like to invite you to visit our web site, write or call us, if you are interested in our services or have any question or doubt. Our interactive website presents some of the services we offer and illustrates the high quality work you can expect from us.

Thank you very much for you time.

Yours sincerely,

DHForest
